

KNOWLEDGE - EXPERIENCE - HONESTY.

Not just words but the cornerstones of Rockingham Turf Care. Nobody in New Hampshire is more qualified to walk onto your lawn and manage its care. We promise to provide the best service possible. You can depend on our honesty; we will never sell you something your landscape doesn't need.

Roger Nownes, Owner - I have 32 years experience in the green industry; 10 years working on golf courses and 22 years in the lawn and tree & shrub industry. I have a B.S. degree in Plant Science from UNH and have attended hundreds of seminars and conferences throughout the years to keep me updated on the latest research and broaden my knowledge.

Rockingham Turf Care offers a variety of comprehensive programs to care for your lawn, trees and shrubs. We tailor our programs to fit the specific needs of your landscape.

Lawn Care Service

Regularly scheduled applications of fertilizer, crabgrass control, and broadleaf weed control to keep your lawn green and weed-free. Other applications such as insecticides, grub control, lime and fungicides may be applied as necessary.

Tree and Shrub Care

Regularly scheduled visits designed to keep your ornamental trees and shrubs as healthy and beautiful as possible. These visits are timed to coincide with certain insect and disease cycles. After a careful inspection of your property, controls are sprayed as necessary. Spring or Fall deep root feedings are also part of this management program.

Other Services

- Non-selective weed control for mulch areas, walkways, waste areas and stone.
- Poison Ivy spray for reducing or eliminating this noxious weed.

LAWN CARE PROGRAM

Spring Application – Balanced fertilizer, pre-emergent crabgrass control and broadleaf weed control.

Early Summer Application – Slow release fertilizer, and surface insect control and broadleaf weed control as needed.

Mid-Summer Application – Slow release fertilizer and broadleaf weed control as needed.

Late Summer/Fall Application – Balanced granular fertilization.

Late Fall Application – Balanced high-potassium winterizer.

EXTRA APPLICATIONS

Guaranteed Grub Control – Applied only if necessary.

Lime – Raises the pH. Needed every 2 years in acidic NH soils. Increases the uptake of essential nutrients.

Disease Control – Sometimes needed when fungal diseases are present.

TREE AND SHRUB PROGRAM

Spring Deep Root Feeding – For more spring growth, superior color and better flower production.

Spring Dormant Oil – For Scale insects, insect eggs and Mite eggs on select trees.

Spring Spray – For Gypsy Moth, Tent Caterpillars, Birch Leafminer, Apple Scab and Aphids.

Summer Spray – For Japanese Beetles, Mites, Lace Bugs and Black Vine Weevil.

Late Summer Spray - For Japanese Beetles, Lace Bugs, Fall Webworm and Mites.

Fall Dormant Oil – For Scale insects, insect eggs and Mite eggs on select trees.

Fall Deep Root Feeding – For stronger roots and increased overall strength.
